

IMPACT SOLAR

an initiative by

COLUMBUS CLEAN ENERGY PARTNERSHIP VENTURES

COMMUNITY RENEWABLE ENERGY

WWW.IMPACTSOLAR.ORG

IMPACT SOLAR INITIATIVE

- Deploying 40 MW of solar across approximately 75 nonprofit, public-serving organizations across Central Ohio
- Delivering low-cost renewable energy that meets or beats current energy costs

HOW IT WORKS

- Impact Solar develops, finances, installs, owns and maintains the solar facility for the nonprofit host
- Host only pays for the energy that it uses, realizing savings immediately
- The low cost rate for power is locked in for a 20 year power purchase agreement providing stable predictable energy costs for the organization's operations
- Impact Solar team marries mission aligned investments like Green Funds with impact lending from local lenders champions, and the capitalization of the renewable energy investment tax credit to deliver low cost solar to public serving organizations
- This collaboration is demonstrating a new way to increase access to renewable energy here in Ohio that is highly replicable and scalable across the state and country.

68 GWH

Displace 68 GWH of regional fossil fuel generation every year

\$116 million

Spur \$116 million in economic growth across Ohio

\$167 million

Produce \$167 million in health benefits for the region from pollutant displacement

\$130 million

Generate \$130 million in energy savings for Ohio nonprofits and government agencies

TARGET OUTCOMES

MEET THE TEAM

Community Renewable Energy is focused on increasing access to solar and climate action solutions for nonprofits, government entities, and low to moderate-income residents. As a member of the Praxia Partners family, CRE draws on an extensive toolkit of expertise to advance community, economic, and environmental development.
